

Basic Level:

1. What is the difference between `FileReader` and `BufferedReader` in Java?
 2. Write a Java program to create a new file and write a string into it.
 3. How can you check if a file exists or not in Java using the `File` class?
 4. Write a program to read a text file line by line and print its contents.
 5. Explain the difference between `FileWriter` and `BufferedWriter` with an example.
-

◆ Intermediate Level:

6. Write a Java program to copy the contents of one file to another.
7. What are the common exceptions you encounter during file handling in Java, and how do you handle them?
8. How can you list all files and directories in a given folder using Java?
9. Write a program to count the number of words in a text file.
10. What is the use of `FileInputStream` and `FileOutputStream`? When would you prefer them over readers/writers?
